DINNER TO DR SYMMERS.

A very enjoyable dinner was given at the School of Masicine on the 26th inst, the gnest of the evening being Dr. Symmers, who is leaving the service of the Egyptian Government to take up the appointment, of professor of pathongy at Belfast.

There were present: Dr. Brahim Hassan Pasha, Dr. H. E. Keatinge, Dr. H. Bitter, Dr. G. Einot-Smith, Dr. W. H. Wilson, Dr. J'R. Naylor, Dr. A. Looss, Dr. W. A. Schmidt, Dr. F. Milken, Dr. Friber, Dr. F. Milken, Dr. Tribe, Judge Halton, Dr. Pisher, Dr. Resido, Pr. Philipp, Dr. Madden, Dr. Nolan, Br. Shukry Bey, Dr. Innes Bey, Dr. Alrong, Dr. Sanbarth, Dr. Symmers, Dr. Harrisou, and Dr. Todd.

After dishner was over, Ibrahim Pasha

After dissert was over, Ibrahim Pa-lash Hassan gave the teast of "Prosperty to the School of Medicand," after which Dr. Kastings the Dr. Kastings of the Medicand and the School of Medicand, after which Dr. Kastings the Dr. Kastings of the Medicand and the School of Medicand and the School of Medicand and the School of Medicand Prosperty, At all events, I am sure we all prosperty of the Carro Medicand Herrison, the celebrated Landon surgeon, and Dr. Arleing, edition of the Landon surgeon of much interest to me. In the course of my help thave paid at visit to America, mainly for this purpose, and circumstances have made many taminus with the Landon surgeon of persons whose lives are purposed to be debicated to resistent his the highest and purset sense of the word. In making myself acquainted with the work going on at the Cairo School of Medicine, it was "with the object of seeing how far it fulfilled these conditions. Without extering into details, I, may, say that I found the school work casellately organised and conducted, with well-equipped laboratories and a staff of professors and lectures in every respect equal to the work they had undertaken. Difficulties connected with the language had been largely overcome, and I was surprised to find how well the Egyptian, youth expressed themselves both in writing and speaking. This is no doubt in the first instance highly creditable to the Education Department, to those engaged as exacets in this elementary schools, which I also visited and examined. Turning to the more personal side of the subject, and from the patients' point of view, I also witnessed in the Kare-d'Anji Moghal connected with the School of Medicine much advanced want teaching by demonstrations in various want teaching by demonstrations in various

which we know are rise in Egypt, by new methods and appliances in the publicity; and freatment of the ravages caused by the balliar-ria in the human subject—inve-tigatingle going on in reference to the permissions effects of ankyloisoma; on the industrial population of Egypt and the Sudar relative to its prevention and treatment—and to the terrible havon

occasioned in this country, and the suffering and poverty thus entailed, by eye dissesses, particularly in the young, which often quite unnecessarily caused permanent blindness. Nor ware less vial matters neglected. For instance, I was much struck at the time with the interest Prof. Eilot-Smith paid to our loid and respected friend the pre-historic man and his probable aliments, as well as the professor's very marked attention to your young friend the ducking girl of the XXIs. Dynasty, with the dark wary hair, who certainly appears to have expirated him when he discovered her.

"These and other instances I could mention indisaste that the Cainor School of Medicine is importabilly contributing to the research work in the contribution of the research work that is flow going on wherever mention indisaste that the Cainor School har research work that is now going on wherever met advantage methods are the contribution of the world. It seems to motivate the Rodelive's subject, but of the satirity population of the world. It seems to mot that the Cairor School har reached a point in the history and masturity as an English-quaking institution in Egypt when it might very advantageously be brought in closer-touch with the licensing books of (Freas. Britain), and I succerely hope that this may shortly be the case. Before I sit down, let me offer Dr. Symmers my good wishes and ougratulations on his apportament to Belfast. Competition to obtain appointments of this kind is becoming keener every day. The propertion of persons going in for science teaching as against practing medicine as doctors is considerably on the increase. Formerly, persons entered the medical professions with the object of doctoring people in the ordinary acceptation of the instructions in to be sayed whose aim in hir is to require, the former quite unnecessary. Dr. Symmers is a good specimen of the latter benefactors. Changes in, and additions to, the teaching staff of a medical adoctor on inversity must necessarily not be infrequent, if the high reput
